Daler Arabov

Media artist, engineer and system designer

Creates real-time systems, generative environments and interactions with neurointerfaces. Within ODA.dream, he connects an artistic visual language with sensor and custom-software architecture, the preparation of stage or exhibition configurations and their operation during a presentation.

Practice

Generative environments, interactive installations, stage systems and artistic-interface prototyping. He connects software, sensors and a visual language with preparing and operating a system during a presentation.

Education and professional background

Studied electronic-equipment design and technology at Bauman Moscow State Technical University. Taught technical creativity, supervised graduation projects and founded FabLab TSEKH-4 at BMSTU.

Additional training

2014: MATLAB Fundamentals, an interior-design workshop at BHSAD and laser-equipment training. 2016: LPKF Rapid Prototyping and Brüel & Kjær vibration testing; MTCNA awarded in 2016 (historical, valid for three years). 2018: KAIZEN seminars in production flow, structured problem solving and Lean Foundation.

Documented personal credits

2018: acknowledgement for initiative in regional projects; finalist with the Tree of Knowledge team in Hackathon 2025 (held in 2018). 2021: BMSTU letter confirms graduation in 2011 and employment in 2011-2019. The Rukami certificate for NeuroSync, addressee letters from Tech Week, Code of the Province and Moscow 2030, and the Commission for the Year Three Thousand participation record also appear as separate entries in the ODA archive; their personal addressees remain documented here in the CV.
